

1K Introduction to Quantitative Methods in R

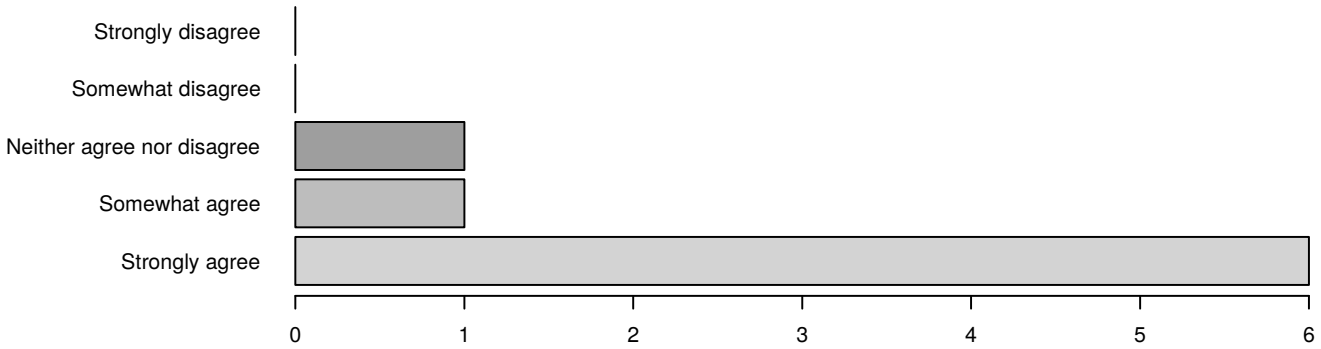

1. The teaching was well organised, structured and clear.

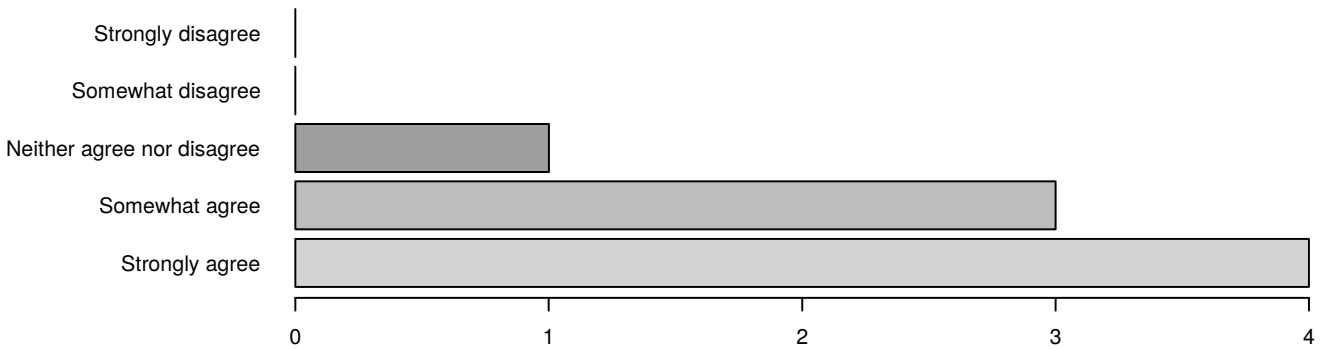

4. The Teaching Assistant (if applicable) was effective and available to provide me with additional support and guidance

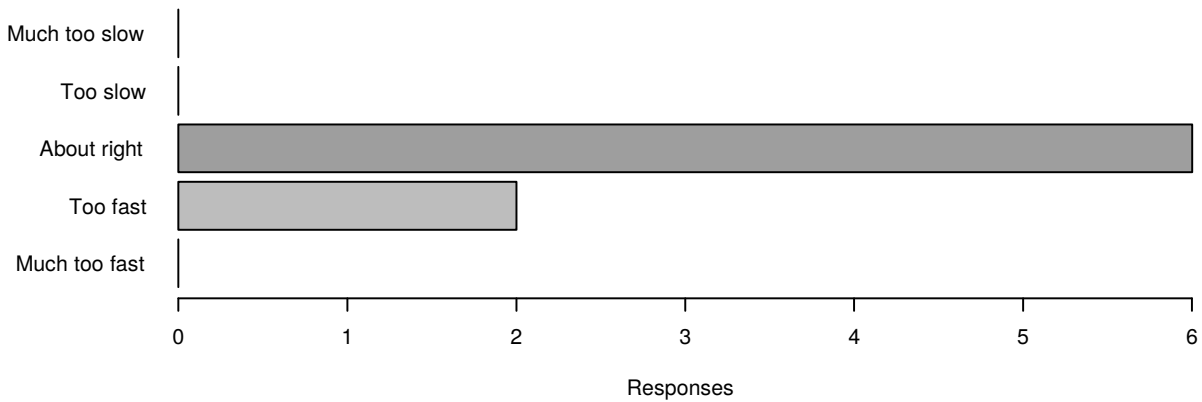

6. The lab/exercises were well coordinated with lectures and added value to the course.

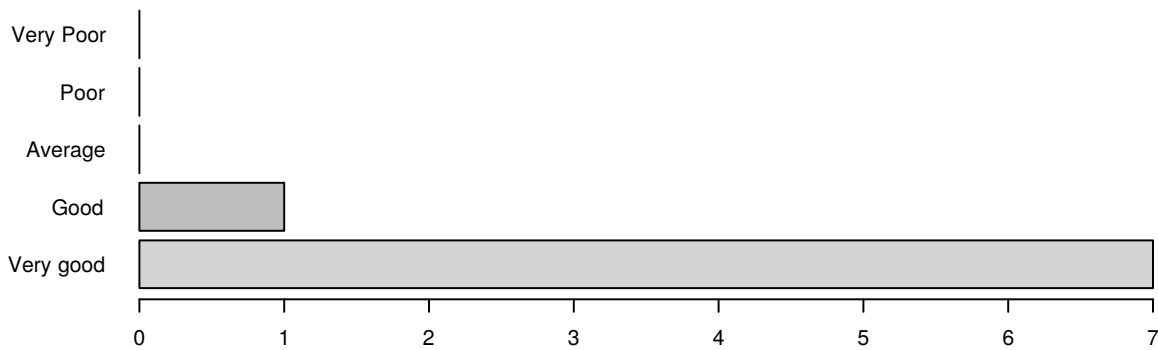

7. The overall level of the course was about right, given my background.

The pace of this course was

In my overall assessment, the course is

This was a very worthwhile course with a seamless transition to online teaching and a considered approach to data analysis and research design. I would like to thank Johannes and Christopher for their teaching. .

It is really really good. Very good study experience. .

Excellent course! .

Splendid. Meanwhile, I wish to suggest data from different field other than political science in the practice sessions may provide different dimensions and possibly stimulate further interest. In addition, examples from outside the United States may equally catalyse interest and understanding from participants/, students drawn from such areas. .
