1. Graduate Teaching Assistant (GTA)

Editing note: this document shows all comments that somehow relate to me or my lab. Comments on the lecture held by the professor are omitted.

Comments Report

1.1) What did you like best about the module and why?

Two very good teachers who, at least for me, managed to transfer their passion for the subject to the students. A hard course, but also rewarding.

This course was the one course of my studies, I learned the most from. Christoph Dworschak gave us valuable input and explained everything really good.

The Lab was very helpful, we learned both to understand the theory and how to apply it

CHRIS WAS A GREAT TEACHER.

It really helped me to develop my analytical skills. Also, Chris is a really good GTA.

THE STRUCTURE AS IT HELPED BUILD A SOLID FOUNDATION

I liked the lab sessions as we could apply the learned material. Great GTA - was super helpful!

The material was pleasantly advanced and the sessions both stimulating and challenging.

1.2) What areas of the module could be improved and why?

More applied research ("real data")

Possibly make it clearer to people what ~~is~~ they will face throughout the course and why they should be interested in it.

Everything is perfect in this module.
